Engineering Geology 43 (1996) 325–326

ENGINEERING GEOLOGY

Contents Volume 43 (1996)

Opinion papers

A hermeneutic reading of the seismic record: improbable probabilities?
D.H. Speidel 1

Individual faults can't produce a Gutenberg–Richter earthquake recurrence
R.B. Hofmann 5

Research papers

Examination of methods for evaluating remining a mine waste site. Part I. Geostatistical characterization methodology
M.L. Smith and R.E. Williams 11

Examination of methods for evaluating remining a mine waste site. Part II. Indicator kriging for selective remediation
M.L. Smith and R.E. Williams 23

Thixotropic behavior during shear of a fine-grained mud from Eastern Canada
D. Perret, J. Locat and P. Martignoni 31

Evolution and origin of the ground fissures in Xian, China
C.F. Lee, J.M. Zhang and Y.X. Zhang 45

A suggested solution to the blind zone problem in shallow exploration surveys
J.S. Kuma and F.T. Suorineni 57

Landslide research in the South Wales coalfield
S.P. Bentley and H.J. Siddle 65

Book review

Fundamentals of Earthquake Prediction, by Lomnitz and Cinna
A.W. Hatheway 81

Special Issue: Fault Activity and Earthquake Proof Design
Y. Kanaori and K. Watanabe 83

Research papers

Analysis of strong motion records form the South Hyogo earthquake of January 17, 1995
F. Oka, M. Sugito, A. Yashima, Y. Taguchi, K. Sekiguchi 85

Earthquake-related ground motion and groundwater pressure change at the Kamaishi Mine
I. Shimizu, H. Osawa, T. Seo, S. Yasuike, S. Sasaki 107

Fault movement and its impact on ground deformations and engineering structures
L.E. Vallejo, M. Shettima 119

The 1995 7.2 magnitude Kobe earthquake and the Arima-Takatsuki tectonic line: implications of the seismic risk for central Japan
Y. Kanaori, S.-ichi Kawakami 135

The 1995 Kobe earthquake and problems of evaluation of active faults in Japan
S. Toda, R. Hataya, S. Abe, K. Miyakoshi 151

Modeling of the interaction between destructive inland earthquakes and large off coast earthquakes in central and south-west Japan
M. Matsuzaki, S.-ichi Kawakami, Y. Kanaori, K. Yairi 169

A new opportunity to detect paleo-earthquake events dating back to the past 10 millennia: a record from lacustrine sediment
S.-ichi Kawakami, H. Fukusawa, Y. Kanaori 177

Seismotectonic environment and design basis earthquake for the Darlington nuclear power station
C.F. Lee 189

Direct ESR dating of fault gouge using clay minerals and the assessment of fault activity
T. Fukuchi 201

Injection veins of crushing-originated pseudotachylyte and fault gouge formed during seismic faulting
A. Lin 213

Research papers
Porewater pressure increases in soil and rock from underground chemical and nuclear explosions
W.A. Charlie, G.E. Veyera, D.S. Durnford, D.O. Doehring 225
Landslide hazard and risk assessment mapping of mountainous terrains – a case study from Kumaun Himalaya, India
R. Anbalagan, B. Singh 237
Application of a fluorescent technique to the study of the weathering process
T. Nishiyama, H. Kusuda 247
Estimates of future impacts of degrading streams in the deep loess soil region of western Iowa on private and public infrastructure costs
L.L. Morris, M.J. McVey, R.A. Lohnes, C.P. Baumel 255
Role of apparent cohesion in the stability of Dominican allophane soil slopes
S.M. Rao 265
Fractal analysis of the fabric changes in a consolidating clay
L.E. Vallejo 281
Use of landslides for paleoseismic analysis
R.W. Jibson 291

Contents Volume 43 (1996) 325
